## SPEED

Le linee della serie Speed sono ispirate alle modernissime forme del mondo dell'aeronautica. Aerodinamicità e leggerezza sono le caratteristiche che contraddistinguono tutte le parti della collezione.

Speed è un prodotto dal design dinamico grazie alle sue sagome che lo slanciano in avanti donando una sensazione di movimento e velocità.

Speed è anche tecnicamente avanzato grazie all'utilizzo della cartuccia diametro 25, degli aeratori a scomparsa, del tettuccio proteggi snodo del bidet, nostro brevetto e di un particolare deviatore utilizzato sul gruppo vasca che ha permesso di eliminare il pomolo, azionando la deviazione dell'acqua semplicemente tirando il flessibile.

Tutte queste peculiarità rendono la serie Speed un gioiello inconfondibile nel panorama odierno e futuro.

Design di Cristian Mapelli, designer del Gruppo di Ricerca e Sviluppo Daniel Rubinetterie. La serie, progettata e prodotta totalmente nei nostri stabilimenti nella provincia di Milano, risulta un altro piccolo gioiello di design e tecnologia del Made in Italy.

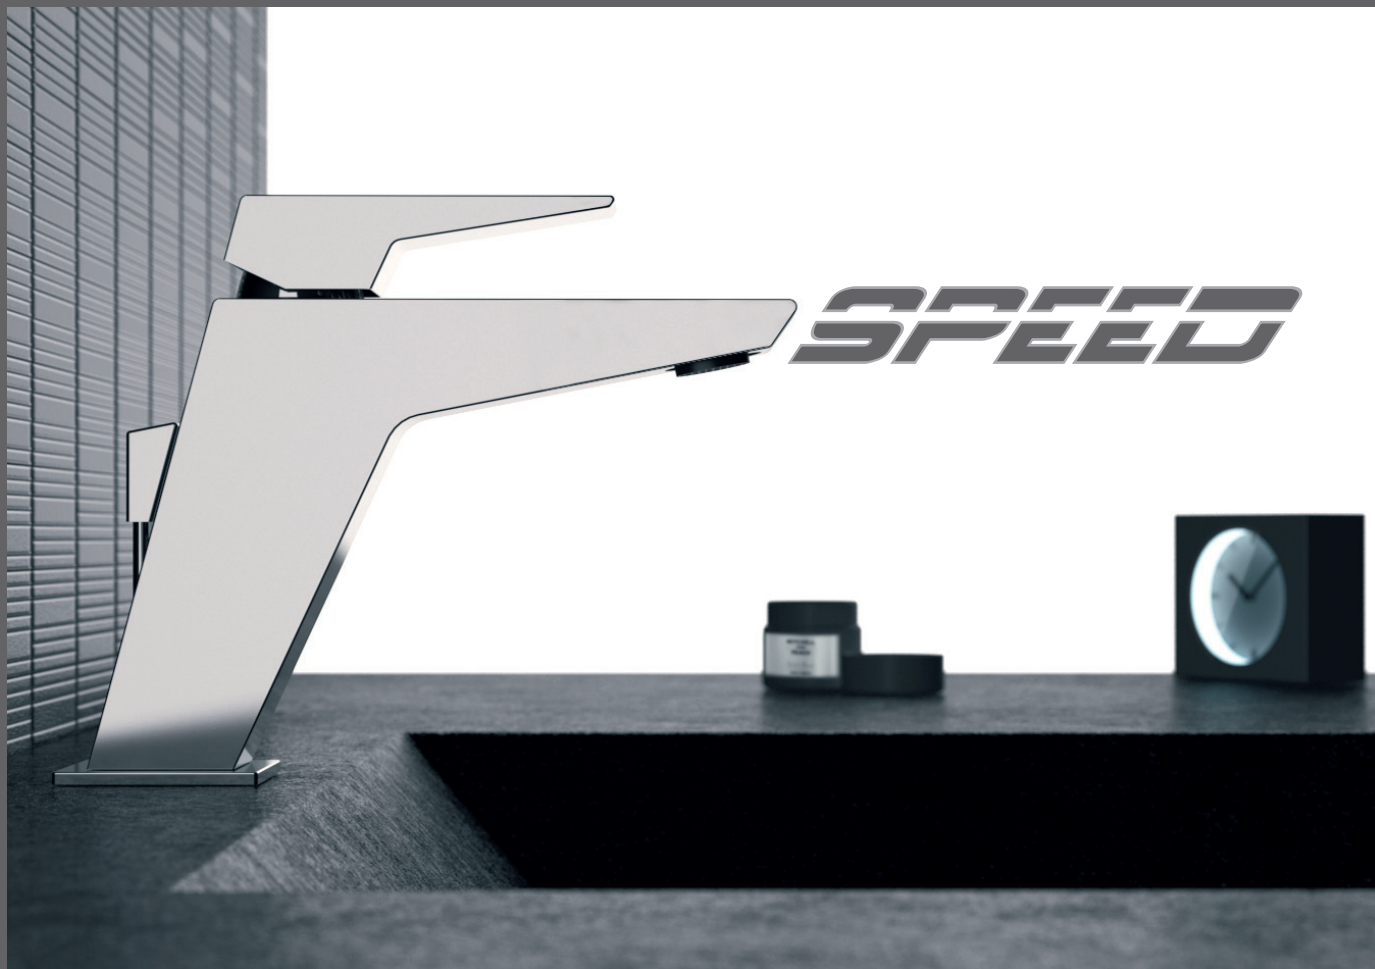

*The lines of Speed serie are inspired by the modern shapes of the aeronautics world. Aerodynamic and lightness are the characteristics that distinguish all the parts of this collection.*

*Speed is a product of dynamic design thanks to its shapes jostling forward and giving a movement and speed effect.*

*Speed is also technically advanced thanks to the use of the diameter 25 cartridge, the hidden aerators, the bidet joint protecting shelter, patented by us, and a particular diverter used on bathtub mixers, that has allowed us to remove the knob, thus activating the water deviation by simply pulling the flexible hose.*

*All these features make the series Speed an unmistakable jewel in the nowadays and future scenery.*

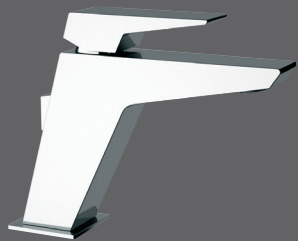

*Design By Cristian Mapelli, designer of Daniel's Research and Development Group. This line, entirely designed and produced in our facilities in Milano, is another little jewel of design and technology "Made in Italy"*

# Dekora

Le linee moderne ed aerodinamiche di Speed vengono esaltate tramite la scelta del tema decorativo che, attraverso la differenza di finitura tra le spazzolate, lucide, tono su tono o in due differenti tonalità a contrasto e tramite giochi di luce e raffinati riflessi, mostrano temi grafici dal design dedicato ed accattivante.

Per questa linea di rubinetteria di nome SPEED, parola anglosassone che significa velocità, e che presenta un design così dinamico e slanciato, abbiamo pensato a due diversi temi decorativi che abbiamo chiamato RACING, per l'associazione con la griglia di partenza delle gare di velocità, ed ELEGANCE, tema decorativo di tipo ottico dal grande impatto visivo che veste perfettamente la serie donandole un'impatto molto ricercato.

Il processo di decorazione è artigianale e realizzato internamente ai nostri stabilimenti a Milano su brevetto italiano ed europeo di Daniel Rubinetterie.

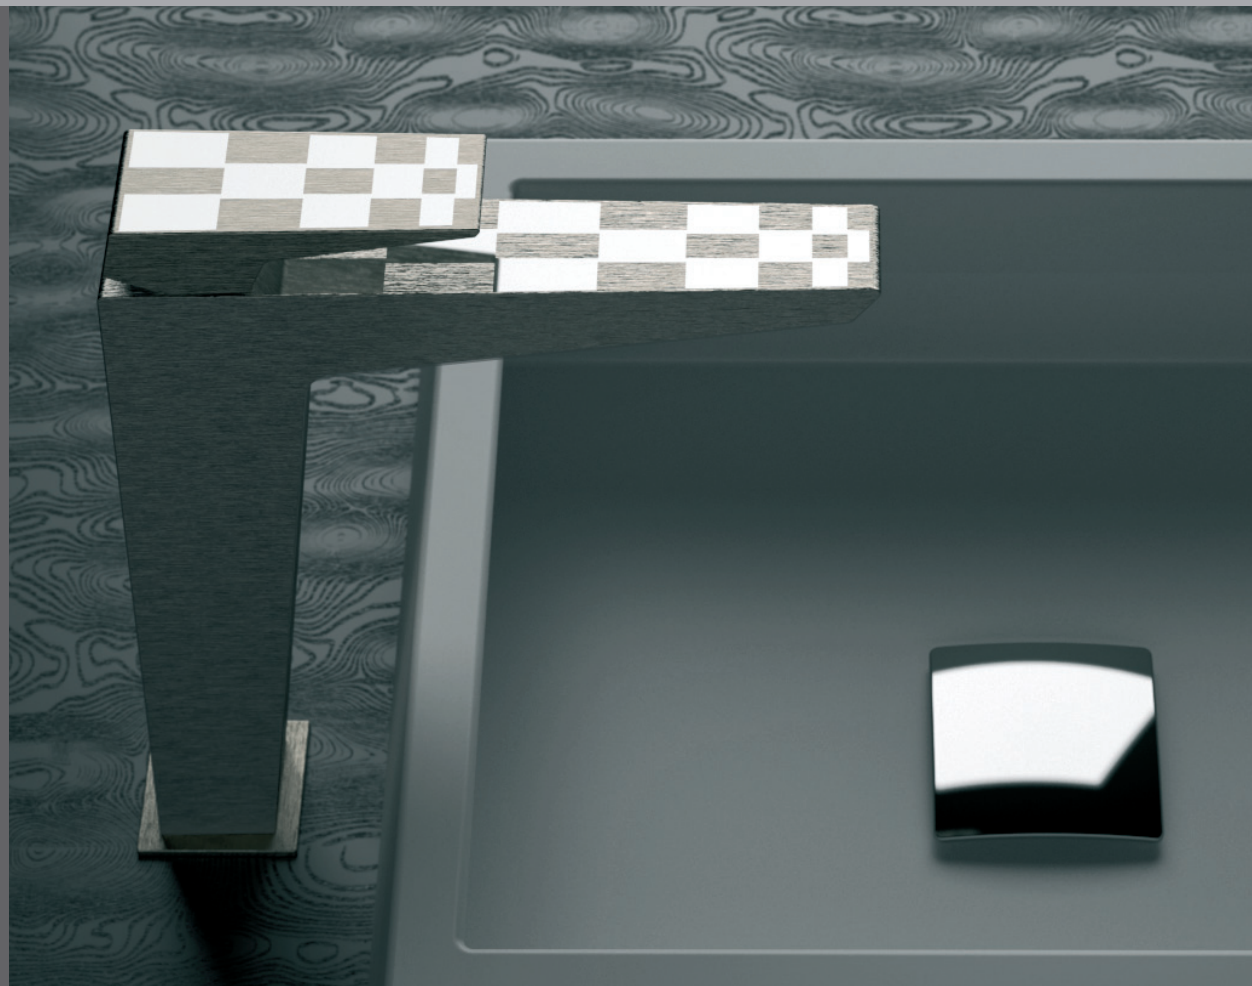

Ogni pezzo è unico, in quanto totalmente frutto della manualità umana, e per questo ancora più prezioso.

*The modern and aerodynamic lines of Speed serie are exalted by the choice of the decorative theme that, through delicate and captivating designs, differences between brushed and shiny finishings, tone on tone or in different shades in contrast and through light games and refined reflexes, shows graphic themes with a delicate and captivating design.*

*For this taps line named SPEED with such a dynamic design, we thought about two different decorative themes that we called RACING, in association with the grid for the speed races, and ELEGANCE, decorative optical type theme with a great visual impact that perfectly fits the series giving it a refined impact.*

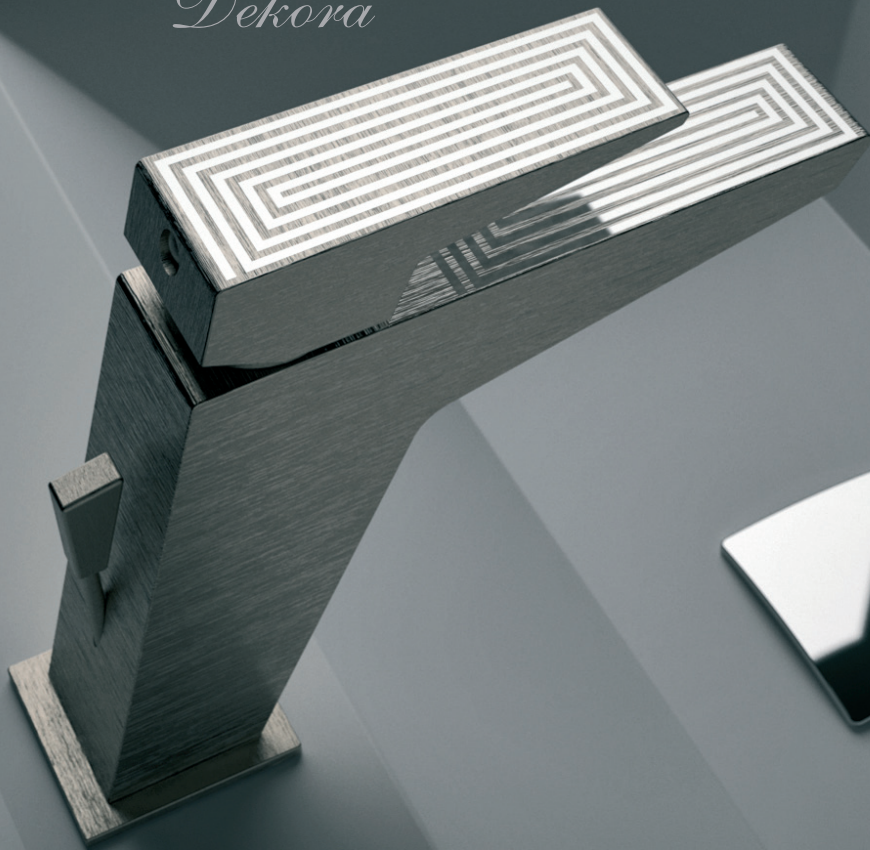

*The decoration process is craft and realized internally in our production facilities in Milan using a particular technique patented by Daniel Rubinetterie.*

*Each piece is unique, as a total result of human manuality, and therefore even more valuable.*
